

Step 1 : i create \Debug\Publish in Repos of WebSite4

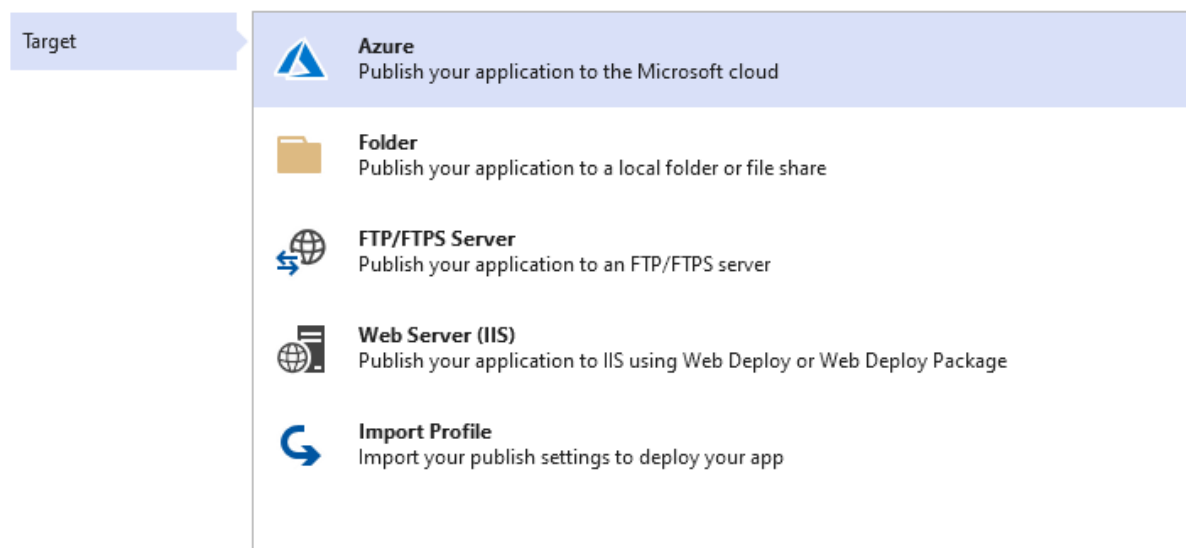

This is the full path: **C:\myaccountvpn\pm\source\repos\WebSite4\Bin\Debug\Publish**

Step 2: menu Build/ Publih app

## Publish

Where are you publishing today?

Step 3: i click on **Folder** + Finish

## Publish

Provide the path to a local or network folder

Target	Folder location	<input type="text" value="bin\Debug\Publish"/>	<button>Browse...</button>
Location	<p>For local folders you can provide either a full path or a relative path to the project, for example:</p> <ul style="list-style-type: none"><li>• publish\ (relative path)</li><li>• C:\Users\Username\Documents (full path)</li></ul> <p>For network folders you have to use \\ and then either the computer name or IP address, for example:</p> <ul style="list-style-type: none"><li>• \\server1\fileshare1</li><li>• \\192.168.1.17\fileshare1</li></ul>		

services

FolderProfile.pubxml

Folder

Add Connected Services to your application

+ New

More actions

Ready to publish.

Settings

Target location

bin\Debug\Publish

Delete existing files

False

Configuration

Debug

Show all

When i click on the Target location, the map gets open.

Step 4: I edit the options and come to this:

Publish

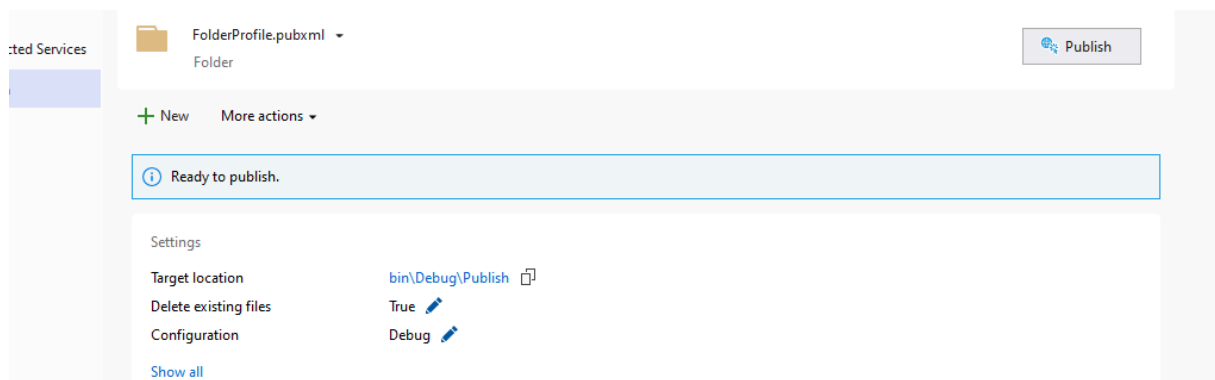

A screenshot of the 'Publish' settings dialog box. On the left, there are two tabs: 'Connection' and 'Settings', with 'Settings' being the active tab. The main area is titled 'FolderProfile \*'. Under 'Configuration:', a dropdown menu shows 'Debug'. Below this is a section titled 'File Publish Options' with three checkboxes: 'Delete all existing files prior to publish' (checked), 'Precompile during publishing' (checked, with a blue 'Configure' link next to it), and 'Exclude files from the App\_Data folder' (unchecked). A 'Databases' section is separated by a horizontal line, containing an information icon and the text 'Database publishing is not supported for this publish method.'

Step 5: i click on **Configure** and i **unselect Allow precompiled site to be updatable**

Advanced Precompile Settings

A screenshot of the 'Advanced Precompile Settings' dialog box. It has two main sections: 'Precompile options' and 'Merge options'. In 'Precompile options', there are two unchecked checkboxes: 'Allow precompiled site to be updatable' and 'Emit debug information'. In 'Merge options', there are three radio button options: 'Do not merge' (selected), 'Do not merge. Create a separate assembly for each page and control', and 'Merge all outputs to a single assembly'. Below the third option is an empty text box. There is also an unchecked checkbox for 'Treat as library component (remove the AppCode.compiled file)'. Below that is another radio button option 'Merge each individual folder output to its own assembly', followed by the text 'Assembly prefix (optional):' and an empty text box. At the bottom, there is a third radio button option 'Merge all pages and control outputs to a single assembly' with an empty text box below it. At the very bottom right are 'OK' and 'Cancel' buttons.

This is the final situation:

Last step: i click on **Publish** and then this happens:

	Code	Description	Project
		Copying file packages\Microsoft.CodeDom.Providers.DotNetCompilerPlatform.2.0.1\build\net45\Microsoft.CodeDom.Providers.DotNetCompilerPlatform.Extensions.props to C:\Users\myaccountvpn\AppData\Local\Temp\WebSitePublish\WebSite4--317451817\obj\Debug\AspnetCompileMerge\Source\packages\Microsoft.CodeDom.Providers.DotNetCompilerPlatform.2.0.1\build\net45\Microsoft.CodeDom.Providers.DotNetCompilerPlatform.Extensions.props failed. Could not find a part of the path 'C:\Users\myaccountvpn\AppData\Local\Temp\WebSitePublish\WebSite4--317451817\obj\Debug\AspnetCompileMerge\Source\packages\Microsoft.CodeDom.Providers.DotNetCompilerPlatform.2.0.1\build\net45\Microsoft.CodeDom.Providers.DotNetCompilerPlatform.Extensions.props'.	WebSite4

C:\Users\myaccountvpn\AppData\Local\Temp\WebSitePublish\WebSite4--317451817\obj\Debug\AspnetCompileMerge\Source\packages\Microsoft.CodeDom.Providers.DotNetCompilerPlatform.2.0.1\build\net45 **is empty** (Deze map is leeg = this map is empty).
