

On-Demand Assessment Lync/Skype for Business Server: Onsite Engineer

On-Demand Assessment

Delivery Options: 3 days remote OR 1 day remote + 2 days onsite

Overview

Gain an insight into the health of your Skype for Business Server environment by proactively diagnosing issues and risks, reviewing your results online, and receiving continuous updates to best practice guidance.

Analyze your environment against best practices developed by Microsoft technology experts, then work with a Microsoft engineer to understand your results and develop a plan that limits risk and improves your environment.

Objectives

- Gain an expert's perspective on what issues you should address first.
- Optimize your environment based on Microsoft best practices to prevent issues before they arise.
- Establish a baseline so you can track your progress throughout the year.

Methodology

Setup your assessment

Prior to working with your Microsoft engineer, you will setup your assessment and generate your first set of results. Get started at <https://docs.microsoft.com/en-us/services-hub/health/index>.

Expert analysis

Your Microsoft engineer will analyze your results, help you understand each issue identified and ensure that you have the right information to fix the issue.

Persist and improve

Re-assess your environment on a monthly basis using the latest updates to continually drive improvement throughout the year.

Key Takeaways

- Holistic recommendations that enable you to improve your people, process and technology.
- Expert analysis and a prioritized guidance on what to fix first.
- Regular updates to guidance and features.
- In-depth review of findings with subject matter expert.

Scope

Assess the hardware configuration, performance, and call data of your Lync/Skype for Business Server environment.

This assessment is available for a single Lync/Skype for Business Server environment with up to 85 servers and 150,000 users on supported versions of Lync Server and Skype for Business Server.

Agenda

Welcome call

Occurs 2-4 weeks before delivery with your Microsoft Engineer and Customer Success Account Manager.

Setup and initial results

You complete the assessment setup and initial result gathering prior to your analysis.

Engineer led analysis

Your Microsoft engineer will analyze your results and lead the in-depth review of your findings in three days remote meetings or a one-day remote meeting in addition to two onsite days.

Your engineer will work with you to develop a prioritized list of recommendations.

Close out meeting

Finalize and deliver your results.
